Few thoughts

- PC composition
 - Find the rising stars
 - Ensure diversity (gender, area, expertise, new blood)
- one researcher, when invited, politely suggested, “in the spirit of promoting young talents”, that we invite a talented younger researcher (we invited both)
- Idea: when inviting PC members, ask each person, if they wish, to suggest one other name (which would be a rising star or which would increase diversity in some way)

Few thoughts

- Budget! (for FLOC years)
 - We had no control over the budget (all in FLOC hands, including sponsors etc)
 - We still had to pay for the proceedings
 - All we could do is use left over budget from previous years
 - Plan a buffer each non-FLOC year?
- LIPIcs:
 - Used at last ITP, open access
 - Worked really well; super smooth; best experience (Leo)

Few thoughts

- Guidelines for PC chairs / PC members
 - "Bar" for acceptance not always clear
 - Also with proof pearls / short papers
 - Also with mathematical formalization: guidelines between the CS contribution and the maths contribution (opinions varies)
 - (also need to have enough expertise in PC for mathematical contributions)
- Institutional memory
 - Started to put in Github
